FAQ

We don't make cheap bit crushing or decimation on the output sign We really down-sample the structure to the desired sampling rate of recurrence, then approach the data based on the chosen DAC ánd up-sampIe it to thé preferred pitch.. This makes the hold off suitable for endless delay effects It's feasible to make use of MIDI automation to manage the parameters.. TAL-Dub-X is usually no emulation of a particular hardware delay effect and it offers its very own special audio.. Put on't expect a 40GN piano small sample library with examples for every velocity or something identical.. Don't anticipate one of the very clean digital delays An important part of the hold off is certainly a specific saturation phase and a higher quality low pass filtration system with resonance environment.

TAL-Vocoder is usually a classic vocoder emulation with 11 companies that emulates the sound of vocoders from the early 80'beds.. It contains analog patterned parts in combination with electronic algorithms like as thé SFFT (Short-Timé Quick Fourier Transform).

This vocoder does not create a direct convolution of the company and modulation transmission as some other electronic vocoders maybe do.. It's possible to choose between different electronic analog converters (DAC'beds) to get the vintage audio of various hardware samplers inside yóur DAW.

Togu Sound Collection TAL-Sampler 2 4 2 Document dimension: 60 7 MB TAL-Sampler is certainly not simply a structure player.. The concept can be to bring back the enjoyment sampling had been in the good old instances with small samples, quick loading times and an intuitivé work-flow tó produce your very own sample presets without obtaining lost in the settings.. It's a full included analog patterned synthesizer with a sampler motor as sound source, including a powerful modulation matrix and a higher high quality self-oscillating 24/12/6 dB reduced pass filtration system.. It contains an envelope follower for every óf the eleven companies This vocoder is optimized for tone of voice refinement and consists of some algorithms fór consonants to create the tone of voice more intelligible..
